Introducing...

Pinnacle Collection

Guaranteed for 50 Years

Simple. Clean. Functional.

Our new, minimally designed Pinnacle MGP commercial-grade collection includes a 6 ft. park bench and 4 & 6 ft. picnic tables. Look for more furnishings to complete the collection in 2023 with a single and double receptacle to match. The collection is offered in fade-resistant, subtle earth tone colors perfectly suited to either blend in or stand out in any site. This sleek, extremely durable outdoor furniture is well suited for the long haul! It is rugged, heavy-duty and it has a 50-year guarantee against breakage. Pinnacle MGP site furnishings are a fantastic alternative to wood or metal furniture.

With the obvious advantages HDPE materials have in the construction of outdoor site furnishings, we looked for the best material available. Pinnacle MGP is a solid core HDPE that creates an incredibly strong and rigid finished good.

6 ft. Table

6 ft. Bench

4 ft. Table

Built to endure all seasons from the coast of Florida to Northern Alaska

HDPE has proven to be one of the best materials to build outdoor furniture because of its strength, low maintenance and good looks. Throughout our journey of manufacturing HDPE site furnishings, we found a material even tougher. . . MGP.

For more than 20 years, Marine Grade Polymer (MGP) has been the preferred material for topsides and hulls of sailboats, yachts, and other high-performance luxury vessels. This material stands up to the daily abuse of the sea, hot sun and the strength of ice-cold oceans. We have brought that material into our Pinnacle MGP series, which is particularly ideal for coastal towns and commercial locations that experience harsh weather year-round. Bring on the rain, salt spray or snow!

Simple to assemble

Pinnacle site furnishings ship unassembled, flat-packed, in the smallest footprint possible. Great care went into making assembly as easy as possible. CNC machined pieces fit flawlessly together and our unique cam fastening system aids in one person assembly. Careful thought went into hiding the stainless fasteners creating a clean, minimalist look perfect for your site.

Additional MGP Benefits and Features

- Strong and durable
- Cool to the touch
- Stain resistant
- High impact strength
- Impervious to water, chlorine and salt water
- Mold and mildew resistant
- Does not rot, splinter, swell, delaminate or discolor
- Never needs painting or refinishing
- Abrasion and stress crack resistant
- Maintenance-free
- No acids or harsh chemicals are necessary for cleaning
- UV stable
- Recyclable and environmentally friendly
- Made in the USA
